

CHECK VALVE ACID-PROOF ANGULAR TYPE ZZFA40

CHARACTERISTIC:

Diameter	-	15 -250 mm;
Pressure	-	40 bar (flanged may be drilled for 6, 10, 16, 25, bar)
Temperature	-	up to 250°C for acids, bases and other aggressive media;
	-	up to 550°C for non-toxic media; (with PTFE sealing up to 200°C);
Medium	-	acids, liquors, water, steam and other non-toxic and non aggressive liquid and gas media, engine fuel.

VERSIONS:

type - body material / ends / disc and disc rings / others

Example: ZZFA40 / --- / --- / ---

Example: ZZFB40 / S / P / ---

Type - body material	Sign	Ends	Sign	Disc and disc rings	Sign	Others	Sign
X6CrNi18-10 or GX5CrNi19-10	ZZFA40	Standard - flanged	---	Standard	---	-----	---
		Butt weld ends	S	PTFE ring	P		
X2CrNiMo17-12-2 or GX5CrNiMo19-11-2	ZZFB40	Socked weld	SW	NBR ring	N		
		Threaded	G				

APPLICATION:

The check valve is designed to keep pipeline safe from returning the medium.

MOUNTING AND OPERATING:

The valve can only be mounted and operated by skilled, properly trained and qualified personnel. Incorrect assembly or operation of the valve may have substantial impact on the entire system such as fluid leakage, reduction in system's function etc.

Before a valve is installed the pipeline must be clean from any mechanical impurities. The compatibility of critical parameters of the flow must be checked with the parameters of the valve. Check valve can be mounted to a pipe-line in any position. The direction of flow should only comply with the arrow marked on the body. The valve should be operated strictly with its assign. In order to provide valve's reliability the following suggestions must be observed:

- medium flowing through the valve is supposed to be clean out of any mechanical impurities;
- the valve must be protected from any mechanical damages during its work;
- nominal parameters marked on the valve must be observed.
