

SCREW-DOWN-NON-RETURN VALVE TYPE 468

CHARACTERISTIC:

Diameter	-	15 -300 mm;
Pressure	-	40 bar (flanges may be drilled for PN 6, 10, 16, 25 bar);
Temperature	-	up to 530°C (with PTFE sealing up to $\leq 200^{\circ}\text{C}$);
Medium	-	water, steam and other non-toxic, non aggressive liquid and gas media and engine fuel, sea water.

VERSIONS:

type / ends / body material / disc and disc ring / others

Example: 468 / --- / --- / --- / ---

Example: 468 / S / U / P / WM

Ends	Sign	Body material	Sign	Disc and disc ring	Sign	Others	Sign
Standard - flanged	---	(P250GH) C 22.8	---	Standard	---		---
Butt weld ends	S	or GP240GH		PTFE ring	P	Sea version	WM
Socket weld	SW	16Mo3 or G20Mo5	U	NBR ring	N		
Threaded	G			STELLIT ring	L		

APPLICATION:

The valves are designed to keep pipeline safe from returning the medium. Screw-down-non-return valve can be used as a stop globe valve to open and stop the flow. The valve is not supposed to be used as a regulating device.

P _{max} [bar]	33	21	14	10	6

MOUNTING AND OPERATING:

The valve can only be mounted and operated by skilled, properly trained and qualified personnel. Incorrect assembly or operation of the valve may have substantial impact on the entire system such as fluid leakage, reduction in system's function etc.

Before a valve is installed the pipeline must be clean from any mechanical impurities. The compatibility of critical parameters of the flow must be checked with the parameters of the valve. Stop globe valve can be mounted to a pipe-line in any position. The direction of flow should only comply with the arrow marked on the body. The valve should be operated strictly with its assign. In order to provide valve's reliability the following suggestions must be observed:

- medium flowing through the valve is supposed to be clean out of any mechanical impurities;
- the valve must be protected from any mechanical damages during its work;
- nominal parameters marked on the valve must be observed.
-
